🚀 MERN Pre-Screen Assignment (Frontend Basics)

Evaluate your understanding of:

- HTML structure
- CSS styling & responsiveness
- JavaScript DOM manipulation & logic

💡 **Project Idea:**

"Smart Student Dashboard"

Build a **mini dashboard web app** for students to manage their daily tasks.

📌 **Features Required**

1. 🧱 HTML (Structure)

- Create a proper layout:
  - Header (Title: *Student Dashboard*)
  - Input section (Add task)
  - Task list section
  - Footer (optional)

---

2. 🎨 CSS (Design)

- Clean modern UI (not plain HTML)
- Must include:
  - Flexbox or Grid
  - Hover effects
  - Button styling
  - Card-style task items
- Responsive design (mobile friendly)

---

3. ⚙️ JavaScript (Core Logic)

Must Implement:

✅ Add Task

- User can type a task and add it to the list

✅ Delete Task

- Remove task on button click

✅ Mark as Completed

- Toggle (strike-through or color change)

✅ Task Counter

- Show total tasks + completed tasks

🌟 Bonus (For Top Students)

- Local Storage (save tasks after refresh)
- Filter buttons (All / Completed / Pending)
- Dark Mode toggle

📂 Submission Format

Students must submit:

- index.html
- style.css
- script.js

OR a single combined file.

🧪 Evaluation Criteria (100 Marks)

Criteria	Marks
HTML Structure	20
CSS Design & Responsiveness	25
JavaScript Functionality	30
Code Quality (clean & readable)	15
Bonus Features	10

⚠️ Rules

- ❌ No frameworks (React, Bootstrap, etc.)
- ❌ No copying from internet
- ✅ Pure HTML, CSS, JS only

🧠 What This Tests (Important for You)

This assignment helps you quickly identify:

- Who actually understands DOM vs who memorized React
- Who can design UI from scratch
- Who can write clean JS logic
