🚀 MERN Pre-Screen Assignment Evaluate:

- DOM manipulation skills
- Event handling
- Logical thinking
- UI/UX creativity

💡 **Project Idea:**

"Interactive Quiz App"

Build a dynamic quiz application where users can attempt a quiz and see their score instantly.

📌 **Features Required**

1. 🧱 HTML (Structure)

- Title: *Quiz App*
- Start button
- Question container
- Options (4 choices per question)
- Next button
- Result screen

---

2. 🎨 CSS (Design)

- Clean card-based layout
- Highlight selected option
- Show correct/wrong answers visually
- Smooth transitions (optional but good)

---

3. ⚙️ JavaScript (Core Logic)

Must Implement:

✅ Start Quiz

- On clicking start, show first question

✅ Dynamic Questions

- Questions stored in JS array

✅ Option Selection

- User selects one option

✅ Next Question

- Move to next question

✅ Score Calculation

- Show final score at end

🌟 **Bonus (For Top Students)**

- Timer per question ⏳
- Shuffle questions
- Progress bar
- Restart quiz button
- Sound effects

📂 **Sample Question Format (Hint for Students)**

```
const quiz = [
 {
  question: "What is JavaScript?",
  options: ["Language", "Framework", "Library", "Database"],
  answer: "Language"
 }
];
```

🧪 **Evaluation Criteria (100 Marks)**

Criteria	Marks
HTML Structure	15
CSS UI/UX	25
JavaScript Logic	35
Code Organization	15
Bonus Features	10
